CARBONATION KEEPERS

Anyone can bring wine to a party. Stand out by carrying a craft beer in one of these fizz- and flavor-retaining growlers, tested and approved by our team.

by JEFF FOSS

PORTLAND GROWLER CO. THE GRIGRI

Hand-cast with extrathick walls, this ceramic growler (right) kept our beer chilled for close to 24 hours with no loss of carbonation. Testers loved how quickly they could batten down the flip-top lid (essential for freshness) and how the handle made the growler easy to maneuver. It's the heaviest here, but, man, is it well made. *$65; portlandgrowlercompany.com*

PRO TIP

"FOR OPTIMAL FLAVOR, DRINK YOUR GROWLER IN ONE SITTING. GROWLER BEER BEGINS TO DETERIORATE AS SOON AS THE SEAL IS CRACKED. ONCE YOU'VE EXPOSED THE LIQUID TO OXYGEN, THE FLAVOR STARTS TO GO DOWNHILL." *–KEVIN GREER, CO-OWNER OF DENVER'S BAERE BREWING CO.*

SHINE VESSELS WANDER AND RUMBLE

Traditional in shape, this stainle steel flagon has a threaded cap for fiz retention. Its single-walled build reduce weight but also insulation: It couldn't keep our beer cold for longer than 12 hours. Still, it's sized right–testers loved being able to pour a pint with one hanc *$50; shinevessels.co*

HYDRO FLASK

It looks lik an overwe water bott but what the Hydro Flask lacks in sexine it makes up for in sh utility. The broad, we insulated bottle has an extrawide mouth easy gulping. It kept our brew frigid for more than a day. $5 *hydroflask.com*

ZYTHOS PROJECT THE BRÄULER

This burly beer keep is designed to minir foam during the fillir process. Whatever the case, it kept our cool and carbonate for a day, and its C injector (sold separa extended the brew life span. Its neopre sleeve offers added insulation. *$60; thezythosproject.co*
