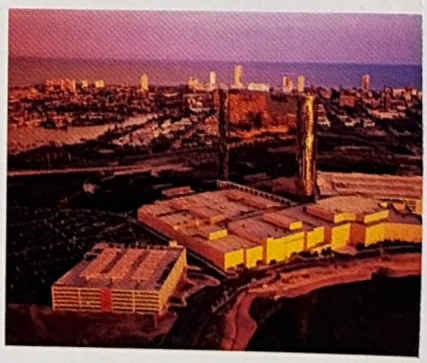
STEEP AND DEEP

BIG SKY, MONTANA


The powder at most major ski resorts gets tracked out faster than you can sing an off-key rendition of "Rocky Mountain High." Not so at Big Sky, where you'll find more beautiful, untouched terrain than Neil Armstrong did on the moon. Point it down epic runs like the Big Couloir and North Summit Field, then regale your boys with stories of endless face plants over après-ski bevvies at Whiskey Jack's. bigskyresort.com
